

## **The Quality Policy of Control Technology UK Ltd**

*'To achieve and maintain a level of workmanship which will be a guarantee to our customers that the products and service we provide will meet applicable requirements. This provides the framework for, and includes, the establishment and review of Quality Objectives*

*It is essential, therefore, that every member of our team including subcontractors, at all levels, performs their tasks correctly, aware of our commitment to Quality Assurance and the fact that they are making a vital contribution*

*A Quality Manual has been prepared, which contains the procedures which will achieve this policy and which conform to ISO 9001: 2015*

*The full Manual is available to any member of our team and relevant sections will be made available to individuals to enable them to operate the Quality Management System*

*This Quality Policy is appropriate to the purpose and context of our business and supports our strategic direction. Our goal is to continually improve the effectiveness of our Quality Management System and any suggestions which may assist us, or which may lead to an improvement in the quality of our products or service, should be forwarded directly to me'*
